The MBTA and the City of Boston are partnering together on the Blue Hill Ave. Transportation Action Plan.

The plan includes our proposal to redesign the corridor between Warren Street in Grove Hall and River Street in Mattapan Square. A new multimodal design will add a center running bus lane for the more than 40,000 bus riders who travel on Blue Hill Ave every weekday, and better define spaces for drivers and pedestrians creating a safer, calmer experience for everyone.

Participate in the Design Process

The MBTA and the City of Boston are continuing to collect input from residents and local business owners block by block. These conversations will help determine bus platform locations, space allocation, expanded and improved pedestrian crossings, and the right mix of parking spaces and loading zones.

There are several ways to provide feedback on the design:

- Look for us along the corridor! We will hold 9 Pop-up Workshops where you can talk to team members and help inform the design of bus stop locations, pedestrian crossings, parking, greenery, and more.
- You can also join us at one of two Community Open Houses where we will roll up our sleeves and mark up plans with your ideas.
- Can't make our events? You can still provide in-depth feedback online in **English, Spanish, Haitian Creole, Cape Verdean Creole, Vietnamese, or Portuguese**: *Survey coming soon, please check the project website*
- Reach out to us using the contact information below to share your input or set up a time to connect.
