

MBTA RED LINE

Wollaston Station Improvements and Quincy Center Station Garage Demolition Project

Wollaston Construction Update

Sewer Work requires construction activities on Brook St., Newport Ave. and Woodbine St. in Quincy

As part of the Wollaston Station Improvement Project, a temporary surface sewer line will be placed in the roadway (see map on reverse side) during a re-lining of an existing sewer line that runs along Brook Street, across Newport Ave and under the existing Wollaston Red Line Station. The sewer work is expected to take two weeks and is scheduled for February, as weather allows. There will be no interruption of sewer service to homes or business in the area. The anticipated schedule is as follows.

February 5-9, 2018:

- Contractor will place surface pipes along route shown in red on the map.
- The temporary by-pass pipes will be laid in the street along the curb in some locations, like Newport Ave, the pipes will be placed in a trench and covered.
- For safety reasons, a pedestrian security fence will be placed on the first block of Brook Street on the north side of the street (see map on reverse side).

February 12-17, the cured-in-place sewer liner process is anticipated to begin:

- The contractor will set up two large diesel pumps at the corner of Brook and Arlington Streets, using three parking spaces (see map on reverse side).
- Access to the sewer will be through existing manholes on Newport Ave, Brook Street and in the Wollaston parking lot-east of the station.
- Traffic lanes will be re-directed around the manholes on Newport Ave and Brook Street while the liner is being installed.
- Once the heating of the fiberglass liner begins, the process must continue until the pipe is cured. This takes 24-36 hours.

Neighbors can expect construction noise from the generators, and there may be some odors from heated resin or sewerage. The lining process is scheduled for Friday night, February 16 to Saturday, February 17, but the date may change. Once the work is complete, the by-pass pipes, pumps and other construction materials will be removed from the area.

We apologize in advance for the disruption and thank you for your patience. If you have questions or concerns, please feel to contact the Project Team at: Wollaston@MBTA.com.
